## Experience

### Work

#### Wilson School District Summer Preventative Maintenance Technician

Jun-Aug 2021, Jun-Aug 2022

Wilson's summer crew requires knowledge of maintenance to upkeep computers provided to every student for the upcoming school year. Most student devices were returned and, as such, would require cleaning or full maintenance. For consideration, employees need to work quickly and on their feet and are required to have a technology focused background as well as an extensive understanding of the entire district's technology infrastructure. Besides hardware repair, faculty laptops and classroom desktops need to be imaged and maintained so they can be reliable during the school year. This position is paid and takes place for the length of each summer.

### Internships

#### Wilson Media Productions 2020-2021

Wilson Media Productions' student learning positions provide an opportunity for students to work daily in an authentic job setting with the Media Production manager to study all aspects of video production as well as media support for staff and students in an educational environment.

#### Wilson Technology Department 2020-2021

Technology Operations' student learning positions provide an opportunity for students to work daily with the members of the tech department to study all aspects of technology support, including computer hardware and software, networking, and data management in an educational environment.
